Alert : Enclosure 0 fault occurred

severity Critical

system Unified_212_52_53_Franklin

created Feb 17, 2011 7:36:38 PM

message Enclosure 0 fault occurred.

description An enclosure fault has occurred. This event is generated when any FRU contained in the enclosure (for example, fans, power supplies, blades, or interconnect hardware) is faulted. Usually this event is accompanied by other fault events in FRUs contained within the enclosure.

action Check all the FRUs in the enclosure and correct any faults. If all FRUs are OK, but the enclosure fault will not clear, replace the enclosure.

event code 0x1260830218

Component Description

Type:	Storage Processor	Total Memory:	11.896 GB	Product ID / SN:	CF2H6100300170
Slot:	1	Read Cache Size:	127.000 MB	Part Number:	303 140 010B
eth2:	Link Up, 1 Gbps	Write Cache Size:	767.000 MB		
eth3:	Link Up, 0 Mbps				
eth4:	Link Up, 0 Mbps				
eth5:	Link Up, 0 Mbps				
mgmt:	Link Up, 0 Mbps				
lab:	Link Up, 0 Mbps				
SP A SAS Port 0:	Link Up, 6 Gbps				
SP A SAS Port 1:	Link Up, 0 Mbps
